WE ARE HERE FOR YOU FOR OVER 20 YEARS

MB TECH BB s.r.o. has a rich history on the Slovak market, where it has been operating since 2003. Our beginnings in Banská Bystrica focused on the sale and servicing of refurbished computer equipment.

However, we gradually expanded our range of activities to include wholesale, which became our main activity. We are currently a leading wholesale supplier of competitively priced products on the Slovak, Czech, Hungarian, Croatian and Polish markets. However, we must not forget our continuous efforts to satisfy our end customers.

Our company is based on the fundamental principles of product quality, active communication, professional services, competitive prices and environmental responsibility.

In our portfolio, you will find only products that we have verified and that prioritise quality, performance and price, combined with above-standard services. This philosophy has helped us gain the loyalty of many corporate and individual customers, securing our leading position in the market.

At edutechsavers, we offer **comprehensive solutions for modernising school computing technology**, ensuring that the educational process keeps pace with modern trends and technologies.

In addition to refurbished products from Techsavers, such as laptops, computers and monitors, the portfolio also includes **brand new and cutting-edge interactive technologies that** transform teaching into a digital form and make it interactive and entertaining.

We also offer **additional equipment and services that** are essential for teaching today.

With us, you not only get high-quality products, but also a partner in the form of your **expert consultant**, who will always be at your disposal. We believe that by joining forces, we can take education to the next level.

We have been professionally renovating computer technology since 2003. Under the Techsavers brand, we **give new life to premium laptops, computers and other computer technology**. These are top-of-the-line models from HP, Lenovo, Dell and Fujitsu-Siemens. Thanks to our state-of-the-art technological equipment and rigorous

refurbishment process, we have refurbished **more than 385,000 devices**. We currently operate in the Czech Republic, Poland, Hungary and Croatia. Today, we offer our customers world-class refurbishment and the same benefits as when purchasing new products.

Computing technology Techsavers

Classification according to visual condition

We refurbish our equipment in accordance with strict ISO 9001 standards and internal standards to ensure that it is comparable to new equipment. The only difference between the classes is in appearance. Every product is 100% functional.

VISUAL CONDITION
As new

AS NEW

Devices are in 100% condition, with minimal or tiny scratches on the body. The display is flawless. Overall, the device is 100% functional.

Most popular

VISUAL CONDITION
Very good

VERY GOOD

Devices are 100% functional. The body may show more visible signs of use, and minor imperfections may appear on the display but are nearly invisible when turned on.

VISUAL CONDITION
Fair

FAIR

Devices are 100% functional but show more noticeable signs of wear, such as scratches, dents, or discoloration.

Why workstations?

A workstation is more robust than a typical PC and has better parameters, such as multi-core processors, more memory, more storage, software certification, and the ability to withstand constant use. They have a dedicated graphics card for demanding visual tasks.

Triptych boards

Three-part magnetic board triptych with a highly durable ceramic surface of the highest quality, suitable for intensive writing. The e3 ceramic surface is designed for maximum durability – the ideal choice not only for schools and educational institutions. Thanks to its quality, it is practically indestructible in normal use. The surface is very easy to wipe clean, scratch-resistant and easy to maintain. The perimeter of the board is complemented by an elegant frame made of anodised aluminium profile in a silvershade with grey plastic corners.

Ceramic-magnetic boards

Magnetic boards for markers or chalk with a highly resistant ceramic surface of the highest quality. The ceramic surface is suitable for the highest loads, not only for schools and educational institutions, but also for offices, meeting rooms and public spaces where maximum durability and long life are required. The surface is very easy to wipe clean, scratch-resistant and easy to maintain. A mounting kit for wall mounting is included.

Vertical movement

Professionally engineered aluminium structure compatible with all types of ceramic and interactive boards. The stand is designed for wall mounting, with the entire assembly perfectly unified in design. Its robust aluminium column construction is complemented by cover plates in an anodised aluminium finish. It offers high comfort, quiet and smooth panel movement throughout the product's lifetime, with more than half a metre of vertical travel. Easy to install and requiring minimal maintenance. An optional aluminium shelf can be added to the lifting stand, allowing convenient raising and lowering of the mounted board (the board itself is not included with the stand).

Cutting-edge 3LCD technology from the market leader

There is a reason why Epson sells more projectors than anyone else.

This is a combination of high colour brightness and a wide colour gamut thanks to 3LCD technology. Colours can be up to three times brighter than with 1-chip DLP projector technology.

3x
Higher color
brightness

3LCD

Epson projectors
announced
#1
in image quality

We only offer EPSON data projectors designed specifically for school environments. The reason for this is the advanced 3LCD technology, which is the only one suitable for use with interactive whiteboards in schools and any environment where the presentation of various colour templates is required. Projectors with DLP projection technology, which is not capable of displaying colours with sufficient quality, are even banned in some EU countries for schools and educational institutions!

EXTEND YOUR WARRANTY TO YOUR DEVICES

Are you worried that your warranty will expire soon and you don't want to invest in new equipment?

Don't worry! With our warranty extension service, you can enjoy peace of mind for years to come.

Extend the warranty on your computer, laptop or other equipment purchased from us by **+1, +2 or even +3 years** and gain the certainty that your computer or other device will be protected even after the standard warranty expires. You will avoid high repair and service costs.

Who is it for?

The offer is intended primarily for devices whose warranty is about to expire.

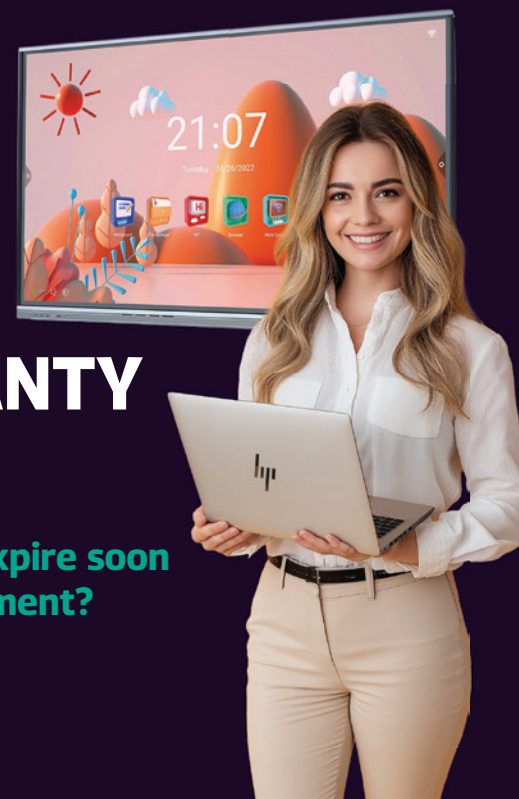

How much does it cost?

Extension of warranty by 1 year = 10% of the price of the device.

If you are unsure when your warranty expires, check here:

techsavers.com/warranty-verification

Extend the life of your equipment. Contact us and choose a warranty solution tailored to your needs!

We take care of the environment about the disposal of school equipment

Take advantage of our service for collecting discarded computer equipment and rest assured that that it will be handled responsibly and ecologically.

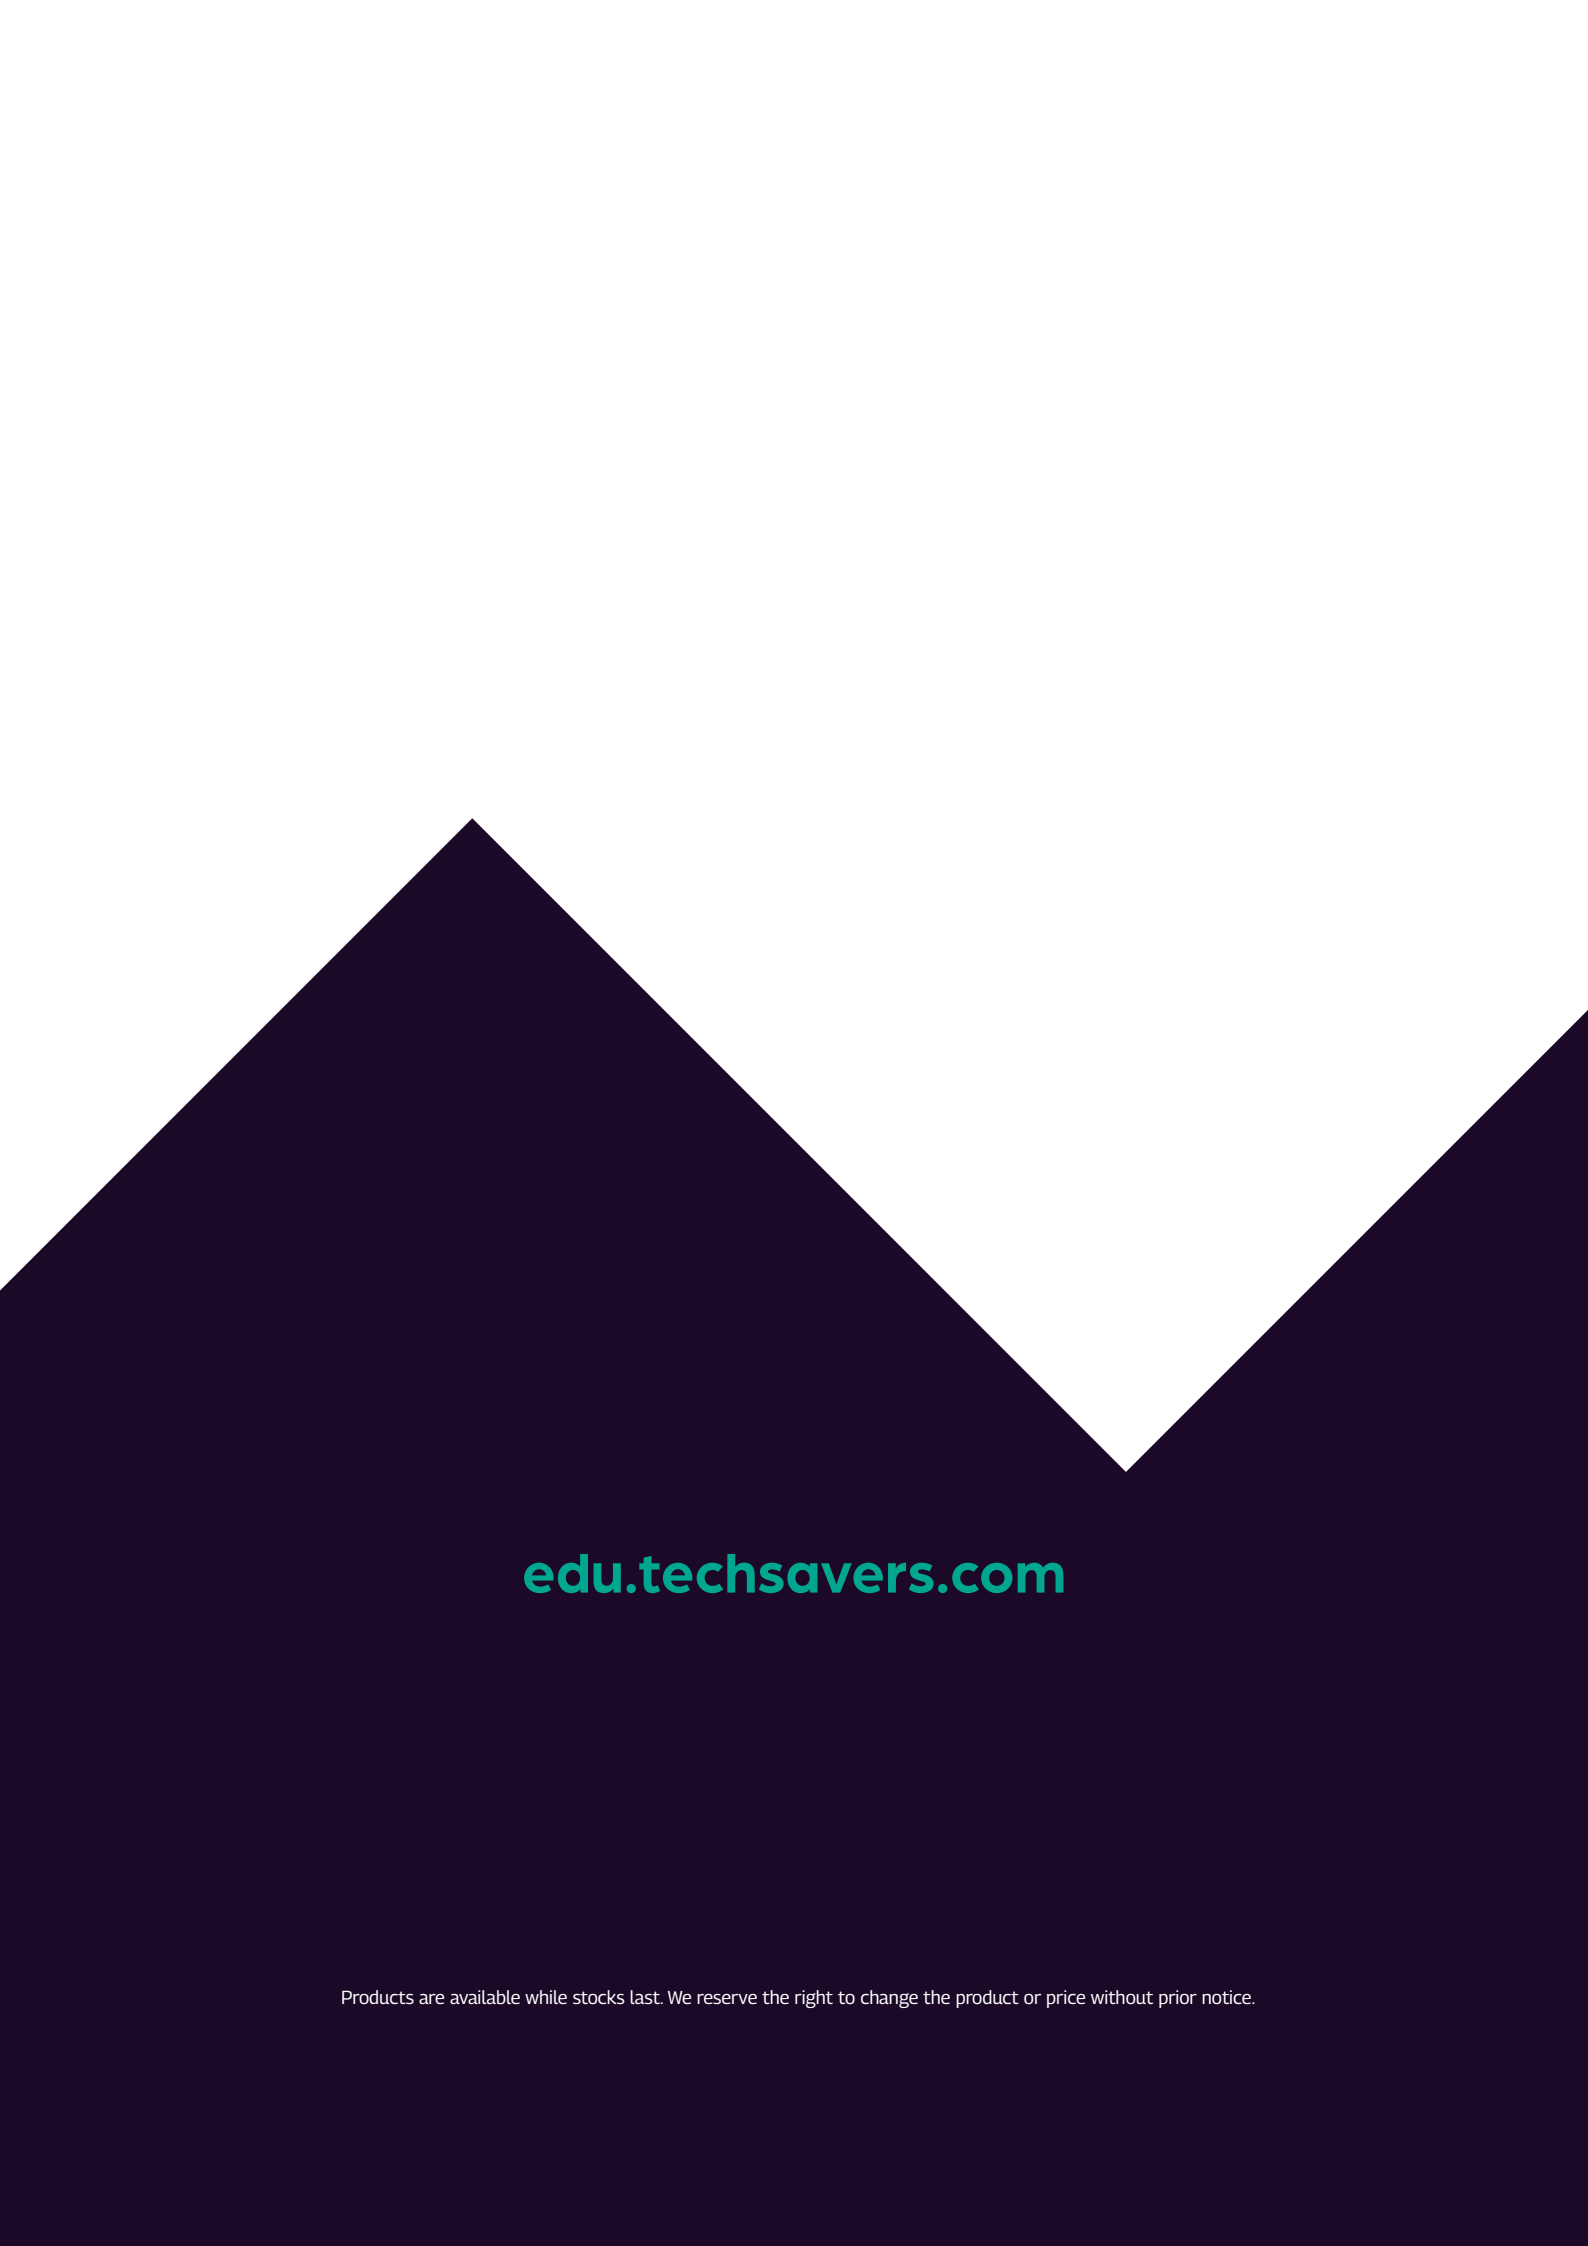

We protect the environment by properly recycling computer equipment.

For all schools to which we supply school equipment, we offer the option of removing discarded equipment. We care not only about the quality of the equipment we supply, but also about the responsible recycling of the equipment we replace. This service can be offered to you by our sales representative.
